

In the 2017-2018 period, our centre hosted 98 undergraduate, 71 master's and 168 PhD students. 35 PhD students received competitive fellowships (e.g., INPhINIT, FPU, FPI) to perform their PhD theses at our institute, and 47 students obtained their PhD degree under the supervision of a CNB scientist.

We are making continuous efforts to attract young people who wish to pursue a scientific career. For instance, in summer 2017 and 2018, we organised the 5th and 6th edition of the “CNB course on introduction to research”, providing undergraduate students first-hand experience in biotechnology research. In collaboration with the CSIC and funding from the Severo Ochoa Centres of Excellence Program, we offered fellowships to attract brilliant master's students, and our researchers showcased the centre's outstanding training opportunities through their participation in numerous university and master's degree programs.

Over the past two years, we have consolidated our PhD training program, launched in 2014 as part of the Severo Ochoa Centres of Excellence Program. The PhD Student's Committee, together with the Training Advisory Committee and with the invaluable help of our Science Communication and Outreach Office (Julia García) organised predoctoral scientific workshops, new PhD student's welcome events, as well as courses fostering public presentation skills or teaching how to write a scientific paper; and Lluís Montoliu spearheaded the implementation of an interactive workshop on ethics and integrity in research.

A rich program of seminars, conferences, workshops and courses, more than 300 in the 2017-2018 period, provide optimal opportunities for our researchers to keep up with the latest advances in biotechnology. Highlights from the past two years include workshops on plant systems biology (Pilar Cubas and Antonio Leyva) and genomic editing in bacteria (Laura Cueto and Miguel Vicente), the launch of the CNB Severo Ochoa “Challenges in Life Sciences” workshop series with the topic “Redefining disease” (Susanna Manrubia) and the organisation of a crash course on how to manage a biotech startup (Ana Sanz).
