

# VI Workshop by CNB PhD Students

# June 29th, 2021

#### · 09:30 Welcome to the CNB

Of special interest for PhD students who have started from September 2019.

### · 10:00 VI Workshop by PhD Students

Session I. Chair: Leticia Lucero

- 10:00 Marina Higuera. Decoding Cardiac Progenitor Cells.
- **10:15 Iker Atienza.** *Modelling of epidemic spread: Effects of individual behaviour and contention strategies on pathogen propagation and adaptation.*
- **10:30** Enara San Sebastián. Study of the cellular Ku heterodimer in Hepatitis B virus infection.
- **10:45** Eva María Martín. Single-molecule techniques for the study of nucleic acids and protein machines.
- 11:00 Almudena Méndez. Bacteria as lymphocyte trainers against cancer.

#### 11:15 Break

## Session II. Chair: Arturo Vesga

- **11:45 Aitor Muñoz.** *To grow or not to grow? Molecular mechanisms in BRANCHED1-dependent new branch formation.*
- **12:00 Ane Calvo**. The study of a possible relationship between inflammation and IFN-I signalling pathway.
- **12:15 Alvar Alonso.** *Genome-wide associations on trial.*
- **12:30 Jesús Hurtado.** *Coronavirus reverse genetics and its use in SARS-CoV-2 pathogenesis studies.*
- **12:45 Guy Axl Novoa.** The atypical lifestyle of the viruses Yado-nushi and Yado-kari.
- **13:00** Laura Toribio Celestino. Elucidating the molecular bases of successful associations between antibiotic resistance plasmids and clinical enterobacteria.
